Approval: garlic juice in biocidal products

Published by AGRINFO on 16 Apr 2024

Regulation (EU) 2024/893 approving thermally treated garlic juice as an existing active substance for use in biocidal products of product-type 19

What is changing and why?

The EU has approved thermally treated garlic juice as an active substance for use in biocidal products used to manage harmful pests such as rodents.

Garlic extract is not considered to be a risk for consumers, so no maximum residue levels (MRLs) are required.

Timeline

The active substance thermally treated garlic juice will be officially approved for use for a 10-year period from 1 July 2025.
