## What are the major implications for exporting countries?

The potential benefits of geographical indications such as PGIs and PDOs are presented in [Geographical indications for agricultural products and foodstuffs explained](#).

## Background

Applications for registration of PDOs and PGIs received by the European Commission are published in the *Official Journal of the European Union*.

If no statement of opposition has been received by the European Commission within 3 months, the PDO/PGI is registered as geographical indication in the EU register ([eAmbrosia](#)) and granted protection in the EU (Regulations [2024/1143](#) and [2025/26](#)).

For further information on the EU's system for protecting geographical indications, see [Geographical indications for agricultural products and foodstuffs explained](#).
