Authorisation: import of various genetically modified maizes

Published by AGRINFO on 23 Oct 2023

Commission Implementing Decision (EU) 2023/2133 of 13 October 2023 authorising the placing on the market of products containing, consisting of or produced from genetically modified maize MON 89034 × 1507 × MIR162 × NK603 × DAS-40278-9 and nine sub-combinations

Commission Implementing Decision (EU) 2023/2134 of 13 October 2023 authorising the placing on the market of products containing, consisting of or produced from genetically modified maize MON 87419

Commission Implementing Decision (EU) 2023/2143 of 13 October 2023 renewing the authorisation for placing on the market of products containing, consisting of or produced from genetically modified maize MIR162

What is changing and why?

These Decisions allow non-EU countries to export to the EU the following genetically modified (GM) maize varieties or food/feed products containing these maizes: MON 89034 × 1507 × MIR162 × NK603 × DAS-40278-9 and nine sub-combinations; MON 87419; and MIR162.

These maize varieties cannot be cultivated in the EU, and any products of these maizes (except food/food ingredients) sent to the EU must be labelled “not for cultivation”. There are no safety or nutritional concerns associated with consuming these genetically modified maizes.

Timeline

These Decisions apply for a period of 10 years.
