

# Feed additives: January–February 2024 authorisations

Published by AGRINFO on 05 Mar 2024

EU authorises or reauthorises certain feed additives, denies other authorisations

Commission Implementing Regulations [2024/220](#), [2024/221](#), [2024/228](#), [2024/231](#), [2024/239](#), [2024/251](#), [2024/252](#), [2024/260](#), [2024/261](#), [2024/262](#), [2024/265](#), [2024/285](#), [2024/749](#), [2024/750](#), [2024/752](#), [2024/754](#), [2024/763](#)

## Update

An overview of the latest authorisations, reauthorisations, and denied authorisations of feed additives and their use in animal nutrition in target animals.

## Impacted products

Feed additives, prepared fodder

## What is changing?

### New authorisations (January - February 2024)

In January and February 2024, the EU authorised the new feed additives listed in Table 1.

These authorisations are based on the following opinions published by the European Food Safety Authority: EFSA ([2022a](#)), ([2022b](#)), ([2022c](#)), ([2022d](#)), ([2022e](#)), ([2023a](#)), ([2023b](#)), ([2023c](#)), ([2023d](#)), ([2023e](#)), ([2023f](#)), ([2023g](#)), ([2023h](#)), ([2023i](#)).

### Reauthorisations

In January and February 2024, the EU reauthorised the feed additives listed in Table 2.

These reauthorisations are based on the following opinions published by EFSA: ([2023j](#)), ([2023k](#)), ([2023l](#)), ([2023m](#)), ([2023n](#)), ([2023o](#)), ([2023p](#)), ([2023q](#)).

### Denied authorisations

Regulation [2024/752](#) denies authorisation of a preparation of astaxanthin-rich *Phaffia rhodozyma* (ATCC SD-5340) as a feed additive for salmon and trout, based on EFSA's opinion ([2022f](#)).

## Amended authorisations

Regulation [2024/754](#) authorises the use of a preparation of *Bacillus subtilis* DSM 32324, DSM 32325 and *Bacillus amyloliquefaciens* DSM 25840 for all poultry species simultaneously with the coccidiostats diclazuril, decoquinat, halofuginone, monensin, salinomycin, narasin, a combination of nicarbazin and narasin, and lasalocid, based on EFSA's opinion ([2023r](#)) that these uses are compatible.

The EU also corrected and amended Implementing Regulations (EU) 2022/1421, (EU) 2022/652, (EU) 2022/1490 and (EU) 2022/320 regarding the use of expressed orange essential oil, distilled orange essential oil and folded orange oils from *Citrus sinensis* as feed additives for dogs, cats, horses, rabbits, ornamental fish, and ornamental birds.

## Why?

Applications for the above authorisations and reauthorisations were submitted and considered by the Reference Laboratory set up by the Feed Additives Regulation ([1831/2003](#)).

EFSA could not conclude on the safety of astaxanthin-rich *Phaffia rhodozyma* (ATCC SD-5340) as a feed additive for salmon and trout, and its safety for consumers of these products.

EFSA could not conclude on the safety of citrus by-products as feed additives for dogs, cats and ornamental fish, because they are not normally exposed to those by-products.

## Timeline

Regulations 2024/220, 2024/221, 2024/228, 2024/231, and 2024/260 apply from **1 February 2024**. These authorisations remain valid until 4 February 2034.

Regulations 2024/251, 2024/252, and 2024/285 apply from **6 February 2024**. These authorisations remain valid until 6 February 2034.

Regulations 2024/261, 2024/262, 2024/265, and 2024/285 apply from **7 February 2024**. These authorisations remain valid until 7 February 2034.

Regulations 2024/749, 2024/750, 2024/752, 2024/754, and 2024/763 will apply from **21 March 2024**. These authorisations remain valid until 21 March 2034.

## What are the major implications for exporting countries?

With new authorisations, more feed additives will be available on the market. Authorisations and renewals are valid for 10 years. The way that all preparations and substances specified as feed additives are used must comply with the provisions of use specified in the Annex to each Regulation.

## Recommended Actions

Non-EU countries producing feed additives, compound feed, and feed materials for export to the EU are recommended to check the status of the feed additives in the [EU Feed Additives](#) register.

To be able to filter and to see more information, it is advised to download the register in Excel format (see foot of [Food and Feed Information Portal](#)).

## Background

The procedure for authorising the placing on the market and use of feed additives is set out in Regulation (EC) [1831/2003](#). For the latest updates on feed additives see the [EU Feed Additives](#) register.

## Table & Figures

Table 1 New authorisations of feed additives (January - February 2024)			
Regulation	Additive	Use	Target
2024/228	Preparation of <i>Companilactobacillus farciminis</i> CNCM I-3740	Gut flora stabiliser	Chickens, turkey for fattening
2024/231	Halofuginone hydrobromide (Stenorol)	Coccidiostats and histomonostats	Chickens for fattening; turkeys for fattening, breeding
2024/260	Cumin essential oil ( <i>Cuminum cyminum</i> L.)	Flavouring compounds	All animal species
	Sweet fennel tincture ( <i>Foeniculum vulgare</i> Mill. ssp. <i>vulgare</i> var. <i>dulce</i> )		
	Dong quai tincture ( <i>Angelica sinensis</i> (Oliv.) Diels)		
	Parsley tincture ( <i>Petroselinum crispum</i> (Mill.) Fuss)		
	Star anise tincture ( <i>Illicium verum</i> Hook f.)		
	Asafoetida essential oil ( <i>Ferula-assa-foetida</i> L.)		

	Dill herb essential oil; dill tincture ( <i>Anethum graveolens</i> L.)		
2024/261	Black pepper ( <i>Piper nigrum</i> L.) essential oil, oleoresin, supercritical extract	Flavouring compounds	All animal species
2024/265	Zinc(II)- betaine complex	Nutritional additives	All animal species except aquatic animals in marine aquaculture systems
2024/285	Taiga root tincture ( <i>Eleutherococcus senticosus</i> (Rupr. & Maxim.))	Flavouring compound	Dogs, cats, horses
2024/749	Lignosulphonate	Binder	All animal species
 <a href="http://www.agrininfo.eu">www.agrininfo.eu</a>
