

Feed additives: December authorisations

Published by AGRINFO on 01 Dec 2023; Revised 05 Feb 2024

EU authorises certain feed additives

Commission Implementing Regulations [2023/2732](#), [2023/2733](#), [2023/2734](#), [2023/2736](#), [2023/2802](#), [2023/2846](#), [2023/2850](#)

Update

An overview of the latest authorisations of feed additives and their use in animal nutrition in target animals.

Impacted products

Feed additives, prepared fodder

New authorisations (December 2023)

In December 2023, the EU authorised the new feed additives listed in Table 1.

These authorisations are based on the following opinions published by the European Food Safety Authority: EFSA ([2022](#)), ([2023a](#)), ([2023b](#)), ([2023c](#)), ([2023d](#)), ([2023e](#)), ([2023f](#)).

Why?

Applications for the above authorisations were submitted and considered by the Reference Laboratory set up by the Feed Additives Regulation ([1831/2003](#)).

Timeline

Regulations 2023/2732, 2023/2733, 2023/2734, and 2023/2736 apply from **28 December 2023**. These authorisations remain valid until 28 December 2033.

Regulation 2023/2802 applies from **8 January 2024**. This authorisation remains valid until 8 January 2034.

Regulations 2023/2846 and 2023/2850 apply from **10 January 2024**. These authorisations remain valid until 10 January 2034.

What are the major implications for exporting countries?

With these new authorisations, more feed additives will be available on the market. Authorisations and renewals are valid for 10 years. The way that all preparations and substances specified as feed additives are used must comply with the provisions of use specified in the Annex to each Regulation.

Recommended Actions

Non-EU countries producing feed additives, compound feed, and feed materials for export to the EU are recommended to check the status of the feed additives in the [EU Feed Additives](#) register.

To be able to filter and to see more information, it is advised to download the register in Excel format (see foot of [Food and Feed Information Portal](#)).

Background

The procedure for authorising the placing on the market and use of feed additives is set out in Regulation (EC) [1831/2003](#). For the latest updates on feed additives see the [EU Feed Additives](#) register.

Commission Implementing Regulations:

- 2023/2732 concerning the authorisation of a preparation of *Macleaya cordata* mixture as a feed additive for all poultry species for fattening
- 2023/2733 concerning the authorisation of a preparation of diclazuril (Coxiril) as a feed additive for chickens reared for laying and pheasants
- 2023/2734 concerning the authorisation of a preparation of *Saccharomyces cerevisiae* DBVPG 48 SF as a feed additive for horses, dairy ruminants and pigs
- 2023/2736 concerning the authorisation of a preparation of *Bacillus velezensis* NITE BP-01844 as a feed additive for all poultry species for fattening, chickens reared for laying, turkeys reared for breeding, minor poultry species reared for laying or for breeding and ornamental birds
- 2023/2802 concerning the authorisation of a preparation of endo-1,4-beta-xylanase produced by *Komagataella phaffii* ATCC PTA-127053 as a feed additive for all poultry species for fattening, breeding, and reared for laying or breeding
- 2023/2846 concerning the authorisation of red quebracho extract from *Schinopsis balansae* or *Schinopsis lorentzii* as a feed additive for all animal species

- 2023/2850 concerning the authorisation of a preparation of endo-1,4-beta-mannanase produced by *Aspergillus niger* CBS 120604 as a feed additive for all poultry species for fattening

Table & Figures

Table 1 New authorisations of feed additives (December 2023)			
Regulation	Additive	Use	Target
2023/2732	Preparation of <i>Macleaya cordata</i> mixture	Zootechnical additive	Poultry for fattening
2023/2733	Preparation of diclazuril (Coxiril)	Coccidiostats and histomonostats	Chickens for laying and pheasants
2023/2734	Preparation of <i>Saccharomyces cerevisiae</i> DBVPG 48 SF	Digestibility enhancer	Horses, ruminants and pigs
2023/2736	Preparation of <i>Bacillus velezensis</i> NITE BP-01844	Gut flora stabiliser	Chickens for fattening and laying; turkeys for breeding and fattening; minor avian species
2023/2802	Preparation of endo-1,4-beta-xylanase produced by <i>Komagataella phaffii</i> ATCC PTA-127053	Digestibility enhancer	Poultry for fattening, breeding and laying
2023/2846	Red quebracho extract from <i>Schinopsis balansae</i> or <i>Schinopsis lorentzii</i>	Flavouring compound	All animal species
2023/2850	Endo-1,4-beta-mannanase produced by <i>Aspergillus niger</i> CBS 120604	Digestibility enhancer	Poultry for fattening
