Notifications G/SPS/N/EU/857, G/SPS/N/EU/858, G/SPS/N/EU/863

What is changing and why?

Authorisations and reauthorisations

Between May and July 2025, the European Union (EU) authorised the feed additives listed in Table 1, and renewed authorisations of the feed additives listed in Table 2. These authorisations are based on opinions published by the European Food Safety Authority (EFSA). The conditions of use are described in the respective Regulations.

The EU has also informed the World Trade Organization Sanitary and Phytosanitary Measures (WTO SPS) Committee that it intends to renew the authorisations for eucalyptus tincture and celery seed essential oil as flavouring compounds in feed for certain food-producing animals, and to withdraw the authorisations for their use in feed for other animals.

Withdrawals

The EU also notified the WTO SPS Committee that it intends to withdraw a range of other feed additives. Feed additives are withdrawn from the market if no application for their renewal has been submitted before the deadline provided, or if an application was submitted but subsequently withdrawn. For those feed additives, a transitional period applies within which remaining stocks may be used up. In cases where applications have been submitted or withdrawn only for certain animal species or categories, the withdrawal only concerns those species and categories specified.

Actions

Non-EU countries producing feed additives, compound feed, and feed materials for export to the EU are recommended to check the status of additives in the EU Feed Additives register.

To be able to filter and to see more information, it is advised to download the register in Excel (see Food and Feed Information Portal: Feed Additives > Download Register in Excel format).

Timeline

The authorisations remain valid until the end dates listed in Tables 1 and 2.

Transitional period for withdrawals:

- existing stocks, 12 months
- premixtures, 15 months
- compound feed, 24 months.

Tables & Figures

Table 1
New authorisations of feed additives (May–July 2025)

Regulation	Additive	Use	Target	End date[1]
2025/1254	Riboflavin from *Eremothecium ashbyi* CCTCCM 2019833	Vitamins, pro-vitamins and similar	All animal species	16 Jul 2035
2025/1386	Endo-1,4-beta-xylanase from *Trichoderma reesei* CBS 114044	Digestibility enhancer	Pigs (fattening), hens (laying), minor poultry species	5 Aug 2035
2025/1390	Bacteriophages PCM F/00069, PCM F/00070, PCM F/00071, PCM F/00097	Other zootechnical additives	Poultry	
2025/1392	3-phytase from *Komagataella phaffii* CECT 13171	Digestibility enhancer	Poultry, minor poultry, turkey (breeding, laying, fattening); pigs (all *Suidae*) (fattening)	
2025/1426	*Saccharomyces cerevisiae* CNCM I-1077	Digestibility enhancer, gut flora stabiliser	Ruminants (fattening) other than calves and lambs; camelids (milk production, reproduction); camelid calves (fattening); Equidae (other than horses)	7 Aug 2035
2025/1468	*Bacillus subtilis* DSM 33862 and *Lentilactobacillus buchneri* DSM 12856	Silage additives	All animal species	12 Aug 2035
2025/1523	*Lactiplantibacillus plantarum* NCIMB 30094			18 Aug 2035
2025/1527	*L. plantarum* NCIMB 41028 and *L. plantarum* NCIMB 30148			19 Aug 2035

[1] Authorisations/reauthorisations remain valid for 10 years from entry into force until the date given in the column "End date".

Table 2
Renewed authorisations of feed additives (May–July 2025)

Regulation	Additive	Use	Target	End date[1]
2025/757	Sepiolite	Binder and anticaking agent	All animal species	12 May 2035
2025/1400	Peppermint essential oil	Flavouring compounds	All animal species	6 Aug 2035
2025/1402	Tea tree essential oil			
2025/1403	Spanish sage essential oil			
2025/1417	Spanish type origanum essential oil from *Thymbra capitata*	Flavouring compounds	All animal species	7 Aug 2035
2025/1418	Endo-1,3(4)-beta-glucanase (EC 3.2.1.6), endo-1,4-beta-xylanase (EC 3.2.1.8) from *Talaromyces versatilis* IMI CC 378536	Digestibility enhancer	Pigs (fattening, sows), piglets (weaned), poultry	7 Aug 2035
2025/1424	Biotin and two preparations of biotin	Vitamins, pro-vitamins and similar	All animal species	7 Aug 2035
2025/1465	*Enterococcus faecium* ATCC 53519 and *E. faecium* ATCC 55593	Silage additives	All animal species	12 Aug 2035
2025/1504	*Lactobacillus plantarum* NCIMB 40027			17 Aug 2035

[1] Authorisations/reauthorisations remain valid for 10 years from entry into force until the date given in the column "End date".
