What is changing and why?

Approvals

In January 2025, the European Union (EU) approved the basic substance *Vitis vinifera* seed extract (grape seed extract), and the low-risk active substances *Betabaculovirus phoperculellae* and *Bacillus velezensis* strain RTI301.

Renewals

The EU has renewed the approval of mepiquat chloride until 29 February 2040.

Extensions and amendments

So far in 2025, the EU has extended approval of the substances listed in Table 1.

Actions

Suppliers to the EU market should monitor developments in EU pesticide approvals when considering longer-term strategies on agricultural practices and pest management.

Timeline

A comprehensive list of active substances, their legal status, and expiry dates can be found in the European Commission's [Active substances, safeners and synergists](#) database.
