

Maximum residue level for difenoconazole

Published by AGRINFO on 17 Mar 2025

Regulation (EU) [2024/2612](#) as regards maximum residue levels for chitosan, clopyralid, difenoconazole, fat distillation residues, flonicamid, hydrolysed proteins, and lavandulyl senecioate in or on certain products

What is changing and why?

The European Union (EU) has raised the MRLs for difenoconazole on rye and wheat from 0.1 to 0.3 mg/kg. This follows an application to the EU for modification of these MRLs. An evaluation by the European Food Safety Authority concluded that there are no risks to consumers at these levels.

Timeline

The new MRL applies from **28 October 2024**.
