

Maximum residue level for fenazaquin

Published by AGRINFO on 04 Jun 2024

EU approves import tolerance MRL for fenazaquin on hops

Commission Regulation (EU) [2024/1439](#) of 24 May 2024 amending Annexes II and III to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for fenazaquin, mepiquat and propamocarb in or on certain products

Update

The EU has increased the maximum residue level (MRL) for fenazaquin on hops following a request for an import tolerance.

Impacted products

Hops

What is changing?

The EU has raised the MRL for fenazaquin on hops from 0.05 to 30 mg/kg.

Why?

The EU received an application for an import tolerance MRL with reference to use of fenazaquin on hops in the United States. On the basis of an evaluation by [EFSA \(2023\)](#), it was concluded that there are no risks to consumers at the proposed level.

Timeline

The new MRL will apply from **16 June 2024**.

Background

MRLs are set in accordance with the rules set out in Regulation [396/2005](#). For information on current MRLs for other substances, please consult the [EU Pesticide Residues database](#).
