

Maximum residue level for fenazaquin

Published by AGRINFO on 04 Jun 2024; Revised 31 Mar 2026

Commission Regulation (EU) [2026/742](#) as regards maximum residue levels for cyflufenamid, fenazaquin and nicotine in or on certain products

What is changing and why?

The European Union (EU) has increased the maximum residue level (MRL) for fenazaquin on sweet peppers/bell peppers, tomatoes, and aubergines/eggplants, following a request for modification of the existing MRLs. An evaluation by the European Food Safety Authority has concluded that the new MRLs are safe for consumers.

Timeline

The new MRLs, summarised in Table 1, apply from **20 April 2026**.

For more information see the [full record](#) on the AGRINFO website – where you can also view the latest [AGRINFO Update](#) newsletters and [search](#) the database.

Tables & Figures

Table 1 Changes to fenazaquin maximum residue levels			
Food category	Products	Fenazaquin (mg/kg)	
		Previous MRL	New MRL
Fruiting vegetables	Tomatoes	0.05	0.2
	Sweet peppers/bell peppers	0.01*	0.4
	Aubergines/eggplants	0.01*	0.2
* Limit of determination (LOD).
