

Maximum residue level for fenazaquin

Published by AGRINFO on 04 Jun 2024

Regulation

Commission Regulation (EU) [2024/1439](#) as regards maximum residue levels for fenazaquin, mepiquat and propamocarb in or on certain products

What is changing and why?

The EU has raised the maximum residue level (MRL) for fenazaquin on hops from 0.05 to 30 mg/kg following an import tolerance request from the United States. An evaluation by [EFSA \(2023\)](#) concluded that there are no risks to consumers at this level.

Timeline

The new MRL will apply from **16 June 2024**.
