

Maximum residue level for propamocarb

Published by AGRINFO on 04 Jun 2024

EU raises MRL for propamocarb on honey

Commission Regulation (EU) [2024/1439](#) of 24 May 2024 amending Annexes II and III to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for fenazaquin, mepiquat and propamocarb in or on certain products

Update

The EU has raised the maximum residue level (MRL) for propamocarb on honey following a request to modify this MRL

Impacted products

Honey and other apiculture products

What is changing?

The EU has raised the MRL for propamocarb on honey and other apiculture products from 0.05 to 15 mg/kg.

Why?

Following an application for the MRL for propamocarb on honey to be modified, [EFSA \(2023\)](#) concluded that the proposed amendments are acceptable and do not signify a risk to consumer safety.

Timeline

The new MRL will apply from **16 June 2024**.

Background

MRLs are set in accordance with the rules set out in Regulation [396/2005](#). For information on current MRLs for other substances, please consult the [EU Pesticide Residues database](#).
