

Maximum residue levels for acetamiprid

Published by AGRINFO on 22 Jul 2024; Revised 08 Aug 2025

Commission Regulation (EU) [2025/1212](#) as regards maximum residue levels for acetamiprid in or on certain products

Commission Regulation (EU) [2025/158](#) as regards maximum residue levels for acetamiprid in or on certain products

What is changing and why?

The European Union (EU) has raised the maximum residue levels (MRLs) for acetamiprid on plums, linseeds, poppy seeds, mustard seeds, gold of pleasure seeds, soyabeans, and honey (Regulation [2025/1212](#)).

This follows MRL reductions in January 2025 (Regulation [2025/158](#)) on many products, with the most significant reductions on **asparagus**, **bananas**, **chards**, **currants**, **escaroles**, **lettuces**, and **spinach**. For these products, the MRLs are reduced to the limit of determination (LOD, the lowest level that can be detected using the most modern and reliable analytical methods).

The changes to MRLs are set out in Table 1.

Actions

Suppliers to the EU market of **asparagus**, **bananas**, **chards**, **currants**, **escaroles**, **lettuces**, and **spinach** should review their current use of acetamiprid and seek alternative solutions. Suppliers of other affected products should review their use of acetamiprid and assess whether any changes will be needed to existing good agricultural practices (GAP).

A new review of this substance will be carried out in February 2027. Suppliers should continue to monitor levels of acetamiprid and the GAP for its use in apples, pears, quinces, apricots, sweet peppers, cucumbers, and courgettes, so that data can be submitted to the Commission before 24 September 2026.

Timeline

The MRLs adopted under Regulation [2025/158](#) apply from **19 August 2025**. Suppliers exporting products before 19 August 2025 must ensure that these products already comply with the new MRLs if they are expected to remain on the market after 19 August 2025.

The MRLs adopted under Regulation [2025/1212](#) apply from **20 August 2025**.

Tables & Figures

Table 1 Changes to maximum residue levels for acetamiprid			
Food category	Products	Acetamiprid (mg/kg)	
		Old MRL	New MRL
Pome fruits	Apples, pears	0.4	0.07
	Quinces	0.8	0.15
	Medlars	0.8	0.3
Stone fruits	Apricots	0.8	0.08
	Cherries	1.5	0.8
	Peaches	0.2	0.08
	Plums	0.03	0.04
Berries and small fruits	Table grapes, wine grapes	0.5	0.08
	Blackberries, raspberries (red, yellow)	2	0.6
	Blueberries, cranberries, gooseberries (green, red, yellow)	2	0.7
	Currants (black, red, white)	2	0.01*
	Elderberries	2	0.5
Miscellaneous fruit	Table olives	3	0.9
	Bananas	0.4	0.01*
Fruiting vegetables	Tomatoes	0.5	0.06
	Sweet peppers/bell peppers	0.3	0.09
	Cucumber, courgettes	0.3	0.05
	Melons, pumpkins, watermelons	0.2	0.08
Brassica vegetables	Broccoli, cauliflowers	0.4	0.06
	Head cabbages	0.4	0.03
Leaf vegetables, herbs, and edible flowers	Lamb's lettuces/corn salads, Roman rocket/rucola	3	1.5
	Lettuces	1.5	0.01*
	Escaroles/broad-leaved endives	0.4	0.01*
	Red mustards	3	0.9
	Spinaches, chards/beet leaves	0.6	0.01*
Stem vegetables	Asparagus	0.8	0.01*
Oilseeds	Linseeds	0.01*	0.06
	Poppy seeds	0.01*	0.3
	Soybeans	0.01*	0.01
	Mustard seeds	0.01*	0.15
	Gold of pleasure seeds	0.01*	0.06
Products of animal origin (bovine)	Liver	1	0.03
	Edible offals (other than liver and kidney)	1	0.05
Honey and other apiculture products		0.05*	0.3
