

# Maximum residue levels for aclonifen

*Published by AGRINFO on 20 Jan 2026; Revised 28 Apr 2026*

Commission Regulation (EU) [2026/876](#) amending Annex II to Regulation (EC) No 396/2005 as regards maximum residue levels for acetamiprid, aclonifen, deltamethrin, oxathiapiprolin and potassium phosphonates in or on certain products

## What is changing and why?

The European Union (EU) has increased the MRL for aclonifen on anise/aniseed to 0.03 mg/kg.

This MRL was previously set at 0.01 mg/kg, the limit of determination (LOD, the lowest level that can be detected using the most modern and reliable analytical methods). The European Food Safety Authority has concluded that the proposed MRL for anise/aniseed is safe for consumers.

## Timeline

The new MRL applies from **12 May 2026**.
