

Maximum residue levels for azoxystrobin

Published by AGRINFO on 14 Dec 2022; Revised 09 Oct 2024

Commission Regulation (EU) [2024/2633](#) as regards maximum residue levels for azoxystrobin, famoxadone, flutriafol, mandipropamid and mefentrifluconazole in or on certain products

Commission Regulation (EU) [2024/1078](#) as regards maximum residue levels for azoxystrobin, flonicamid, isofetamid, mefentrifluconazole, metazachlor, pyrimethanil and quartz sand in or on certain products

What is changing and why?

The EU has increased the maximum residue level (MRL) for azoxystrobin on papayas and chicory roots. This follows the evaluation of new adopted Codex MRLs for which the European Food Safety Authority ([EFSA 2023a](#)) did not identify risks to consumers in the EU.

Earlier in 2024 the EU raised the MRLs for azoxystrobin on hops from 30 to 40 mg/kg.

Timeline

The new MRLs on papayas and chicory roots apply from **29 October 2024**.

The new MRL on hops is in application since **6 May 2024**.
