

Maximum residue levels for benthiavalicarb

Published by AGRINFO on 03 Apr 2025; Revised 23 Jan 2026

EU sets benthiavalicarb MRLs to LOD for all products, with impacts on grapes and tomatoes

Commission Regulation (EU) [2026/147](#) of 22 January 2026 amending Annexes II and V to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for benfluralin, benthiavalicarb and penflufen in or on certain products

Update

The European Union (EU) has reduced the maximum residue levels (MRLs) for benthiavalicarb on grapes and tomatoes to the limit of determination (LOD). (The LOD is the lowest level that can be detected using the most modern and reliable analytical methods.) For all other foods, MRLs were already set at the LOD, but some of these are also lowered to reflect the development of more sensitive analytical methods.

Impacted products

Almonds, Brazil nuts, cashew nuts, chestnuts, coconuts, hazelnuts/cobnuts, macadamias, pecans, pine nut kernels, pistachios, walnuts, table grapes, wine grapes, potatoes, garlic, onions, shallots, tomatoes, beans, lentils, peas, lupins/lupini beans, linseeds, peanuts/groundnuts, poppy seeds, sesame seeds, sunflower seeds, rapeseeds/canola seeds, soyabean, mustard seeds, cotton seeds, pumpkin seeds, safflower seeds, borage seeds, gold of pleasure seeds, hemp seeds, castor beans, olives for oil production, oil palm kernels, oil palm fruits, kapok, barley, buckwheat and other pseudocereals, maize/corn, common millet/proso millet, oats, rice, rye, sorghum, wheat

What is changing?

The EU has made the changes to MRLs for benthiavalicarb as summarised in Table 1.

Why?

Benthiavalicarb is no longer approved for use in the EU (see [Benthiavalicarb: approval not renewed by EU](#)). The EU therefore proposes to set all benthiavalicarb MRLs at the product-specific LODs. The LODs are updated by the European Commission to reflect the latest analytical methods on the advice of the EU Reference Laboratories for Residues of Pesticides.

Timeline

The new MRLs apply from **12 August 2026**. For products imported before that date, the previous MRL applies.

Recommended Actions

Suppliers to the EU market of table and wine grapes and tomatoes must find alternative solutions to benthiavalicarb for use on these products by August 2026.

Background

MRLs are set in accordance with the rules set out in Regulation [396/2005](#). For information on current MRLs for other substances, please consult the [EU Pesticide Residues database](#).

Table & Figures

Table 1 Changes to maximum residue levels for benthiavalicarb			
Food category	Products	Benthiavalicarb (mg/kg)	
		Previous MRL	New MRL
Tree nuts	Almonds, Brazil nuts, cashew nuts, chestnuts, coconuts, hazelnuts/cobnuts, macadamias, pecans, pine nut kernels, pistachios, walnuts	0.02*	0.01*
Berries and small fruits	Table grapes, wine grapes	0.3	0.01*
Root and tuber vegetables	Potatoes	0.02*	0.01*
Bulb vegetables	Garlic, onions, shallots	0.02*	0.01*
Fruiting vegetables	Tomatoes	0.3	0.01*
Pulses	Beans, lentils, peas, lupins/lupini beans	0.02*	0.01*
Oilseeds	Linseeds, peanuts/groundnuts, poppy seeds, sesame seeds, sunflower seeds, rapeseeds/canola seeds, soyabeans, mustard seeds, cotton seeds, pumpkin seeds, safflower seeds, borage seeds, gold of pleasure seeds, hemp seeds, castor beans	0.02*	0.01*
Oil fruits	Olives for oil production, oil palm kernels, oil palm fruits, kapok	0.02*	0.01*
Cereals	Barley, buckwheat and other pseudocereals, maize/corn, common millet/proso millet, oats, rice, rye, sorghum, wheat	0.02*	0.01*

* Limit of determination (LOD).
 1. Benthiavalicarb-isopropyl (KIF-230 R-L) and its enantiomer (KIF-230 S-D) and its diastereomers (KIF-230 S-L and KIF-230 R-D), expressed as benthiavalicarb-isopropyl.
