

Maximum residue levels for chitosan, fat distillation residues, hydrolysed proteins, and lavandulyl senecioate

Published by AGRINFO on 09 Oct 2024

Commission Regulation (EU) [2024/2612](#) as regards maximum residue levels for chitosan, clopyralid, difenoconazole, fat distillation residues, flonicamid, hydrolysed proteins, and lavandulyl senecioate in or on certain products

What is changing and why?

The EU has decided that no MRLs are required in relation to use of the basic substance chitosan, and the low-risk substances fat distillation residues, hydrolysed proteins, and lavandulyl senecioate. The MRLs for these substances were previously set at the default value of 0.01 mg/kg.

Timeline

The MRLs for these substances will be removed from **28 October 2024**.
