Maximum residue levels for cyflumetofen

Published by AGRINFO on 30 Nov 2022; Revised 14 Aug 2026

Draft Commission Regulation as regards maximum residue levels for ametoctradin, cyflumetofen, diflufenican and milbemectin in or on certain products

Draft Annex (PLAN/2026/701 rev 0)

What is changing and why?

The European Union (EU) is discussing an increase in the existing maximum residue levels (MRLs) for cyflumetofen on sweet peppers/bell peppers from 0.01 to 2 mg/kg.

An application for a change of MRLs by the producer of cyflumetofen was evaluated by the European Food Safety Authority, and the requested changes were found to be safe for consumers.

Timeline

The new MRL for peppers is expected to apply from early 2027.
