

Maximum residue levels for diazinon

Published by AGRINFO on 27 Oct 2025; Revised 21 Jan 2026

Draft Commission Regulation as regards maximum residue levels for azocyclotin, chlорfenапyr, cyhexatin, diazinon, dicofol, endosulfan, fenarimol, fenpropathrin and profenofos in or on certain products

European Commission (2025) Health and Food Safety Directorate General, Standing Committee on Plants, Animals, Food and Feed, Section Phytopharmaceuticals – Residues, 24–25 November 2025

What is changing and why?

The European Union (EU) is discussing revising the maximum residue levels (MRLs) for diazinon. It was initially proposed to reduce the MRLs on certain products. However, following comments by EU Member States concerning authorised veterinary medicinal products that contain diazinon, a new proposal will now be drafted for this substance.

Timeline

A timeline for the presentation of a new proposal has not yet been given.
