Maximum residue levels for dodine

Published by AGRINFO on 24 Jun 2026; Revised 17 Oct 2026

Commission Regulation (EU) 2026/2289 as regards maximum residue levels for acequinocyl, deltamethrin, dodine, maleic hydrazide, pinoxaden and prothioconazole in or on certain products

What is changing and why?

The European Union (EU) has increased the maximum residue level (MRL) for dodine on grapes from 0.01 to 2 mg/kg. An application for a change of MRL by the producer of dodine was evaluated by the European Food Safety Authority, and the requested change was found to be safe for consumers.

Timeline

The new MRL applies from **5 November 2026**.
