

# Maximum residue levels for ethephon

*Published by AGRINFO on 13 Dec 2024; Revised 27 Jun 2025*

EU proposes to amend MRLs for ethephon - Commission corrigendum

[Draft](#) Commission Regulation amending Annexes II and V to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for dimoxystrobin, ethephon and propamocarb in or on certain products

[Draft Annex](#) PLAN/2024/1305 R2 DRAFT

[Corrigendum Annex II](#) PLAN/2024/1305 v4

## Update

The European Commission has informed the World Trade Organization Sanitary and Phytosanitary Measures (WTO SPS) Committee that it intends to amend the maximum residue levels (MRLs) for ethephon ([G/SPS/N/EU/801](#)).

Revised MRLs will have a particular impact on exporters of **blueberries** where the MRL will be reduced to the limit of determination (LOD). (The LOD is the lowest level that can be detected using the most modern and reliable analytical methods.)

On 23 June 2025, the European Commission published a corrigendum stating that the MRLs for ethephon on **tree nuts** (except hazelnuts and walnuts) are also lowered to the LOD.

MRLs are also proposed to be reduced on **apples**, **pineapples**, **rye**, and **wheat**. The MRL for **barley** will be increased. The EU also proposes to lower the LODs on a wide range of products.

## Impacted products

Grapefruits, oranges, lemons, limes, mandarins, almonds, Brazil nuts, cashew nuts, chestnuts, coconuts, macadamias, pecans, pine nut kernels, pistachios, apples, quinces, medlars, loquats/Japanese medlars, apricots, peaches, blackberries, dewberries, raspberries, blueberries, cranberries, currants, gooseberries, rose hips, mulberries, elderberries, dates, kumquats, carambolas, jambolans, kiwi fruits, lychees, passionfruits, prickly pears, star apples, American persimmons/Virginia kaki, avocados, bananas, mangoes, papayas, granate apples/pomegranates, cherimoyas, guavas, pineapples, breadfruits, durians, soursops/guanabanas, potatoes, cassava roots/manioc, sweet potatoes, yams, arrowroots, beetroots, carrots, celeriacs, horseradishes, Jerusalem artichokes, parsnips, parsley roots, parsley, radishes, salsifies, swedes/rutabagas, turnips, garlic, onions, shallots, spring onions/green onions and Welsh onions, sweet peppers/bell peppers, aubergines/eggplants, okra/lady's fingers, cucumbers, gherkins, courgettes, melons, pumpkins, watermelons, sweet corn, broccoli, cauliflowers, Brussels sprouts, head cabbages, Chinese cabbages/pe-tsai, kales, kohlrabies, lamb's lettuces/corn salads, lettuces, escaroles/broad-leaved endives, cresses and other sprouts and shoots, land cresses, Roman rocket/rucola, red mustards, baby leaf crops (including Brassica species), spinaches, purslanes, chards/beet leaves, grape leaves, watercresses, witloofs/Belgian endives, chervil, chives, celery leaves, parsley, sage, rosemary, thyme, basil and edible flowers, laurel/bay leaves, tarragon, beans (with pods), beans (without pods), peas (with pods), peas (without pods), lentils, asparagus, cardoons, celeries, Florence fennels, globe artichokes, leeks, rhubarbs, bamboo shoots, palm hearts, cultivated fungi, wild fungi, mosses and lichens, algae and prokaryotes, beans (dry), lentils (dry), peas (dry), lupins/lupini beans, linseeds, peanuts/groundnuts, poppy seeds, sesame seeds, sunflower seeds, rapeseeds/canola seeds, soyabeans, mustard seeds, pumpkin seeds, safflower seeds, borage seeds, gold of pleasure seeds, hemp seeds, castor beans, oil palm kernels, oil palm fruits, kapok, barley, buckwheat, pseudocereals, maize/corn, common millet/proso millet, oats, rice, rye, sorghum, wheat, teas, coffee beans, chamomile, hibiscus/roselle, rose, jasmine, lime/linden, strawberry, rooibos, maté, valerian, ginseng, cocoa beans, carobs/Saint John's breads, hops, anise/aniseed, black caraway/black cumin, celery, coriander, cumin, dill, fennel, fenugreek, nutmeg, fruit spices, allspice/pimento, Sichuan pepper, caraway, cardamom, juniper berry, peppercorn (black, green, white), vanilla, tamarind, cinnamon, liquorice, turmeric/curcuma, cloves, capers, saffron, mace, sugar beet roots, sugar canes, chicory roots, milk (cattle, sheep, goat, horse), birds' eggs (chicken, duck, geese, quail), amphibians, reptiles, terrestrial invertebrate animals, wild terrestrial vertebrate animals

## What is changing?

The EU proposes to amend the MRLs for ethephon as summarised in Table 1. Also, the EU proposes to lower the LOD on fruits, vegetables, cereals, sugar plants, and animal products from 0.05 to 0.02 or 0.01 mg/kg, and on oilseeds, oil fruits, teas, coffee, cocoa, and spices from 0.1 to 0.05 mg/kg.

## Why?

When the EU renewed its approval for ethephon (see [EU pesticide approvals, renewals, and extensions in 2023](#)), the European Food Safety Authority (EFSA) recommended lowering the acceptable daily intake (ADI) for this substance ([EFSA 2023](#)). Based on this reduced ADI, [EFSA \(2024\)](#) reviewed all MRLs for ethephon.

The European Commission also consulted the EU reference laboratories for residues of pesticides as regards the need to adapt certain LODs. Those laboratories proposed product-specific LODs for ethephon that are analytically achievable, ensuring compliance with updated safety and monitoring standards.

## Timeline

New MRLs are expected to apply from approximately January 2026.

## Recommended Actions

Suppliers of **apples, pineapples, rye, and wheat** should review their current use of ethephon and assess whether any changes will be needed to existing good agricultural practices (GAP) to ensure compliance with the new MRLs. Suppliers of **blueberries and nuts** in particular should evaluate their current use of ethephon and explore possible alternative solutions in anticipation of these MRL changes.

Feedback on the EU's proposal ([G/SPS/N/EU/801](#)) closed on 3 February 2025.

## Background

MRLs are set in accordance with the rules set out in Regulation [396/2005](#). For information on current MRLs for other substances, please consult the [EU Pesticide Residues database](#).

## Table & Figures

Table 1 Changes to maximum residue levels for ethephon			
Food category	Products	Ethephon (mg/kg)	
		Old MRL	New MRL
Tree nuts	Almonds, Brazil nuts, cashew nuts, chestnuts, coconuts, macadamias, pecans, pine nut kernels, pistachios	0.1	0.02*
Pome fruits	Apples	0.8	0.7
Berries and small fruits	Blueberries	20	0.01*
Miscellaneous fruit	Pineapples	2	1.5
Cereals	Barley	1	1.5
	Rye	1	0.8
	Wheat	1	0.5
