

# Maximum residue levels for ethephon

*Published by AGRINFO on 13 Dec 2024*

**Draft** Commission Regulation as regards maximum residue levels for dimoxystrobin, ethephon and propamocarb in or on certain products

**Draft Annex:** PLAN/2024/1305 R2 DRAFT

## What is changing and why?

When the EU renewed its approval for ethephon, the European Food Safety Authority (EFSA) recommended lowering the acceptable daily intake (ADI) for this substance. Based on this reduced ADI, the maximum residue levels (MRLs) for ethephon are now changing as set out in Table 1.

The EU also proposes lower the limit of determination (LOD) on fruits, vegetables, cereals, sugar plants, and animal products from 0.05 to 0.02 or 0.01 mg/kg, and on oilseeds, oil fruits, teas, coffee, cocoa, and spices from 0.1 to 0.05 mg/kg. These product-specific LODs are analytically achievable and ensure compliance with updated safety and monitoring standards.

## Actions

Suppliers of **apples, pineapples, rye, and wheat** should review their current use of ethephon and assess whether any changes will be needed to existing good agricultural practices (GAP) to ensure compliance with the new MRLs. Suppliers of **blueberries** in particular should evaluate their current use of ethephon and explore possible alternative solutions in anticipation of these MRL changes.

Authorities in countries that are members of the WTO can provide feedback on the EU's proposal ([G/SPS/N/EU/801](#)) by emailing the [EU SPS Enquiry Point](#) until **3 February 2025**.

## Timeline

New MRLs are expected to apply from approximately January 2026.

## Tables & Figures

| Table 1<br>Changes to maximum residue levels for ethephon   |             |                  |         |
|---|-------------|------------------|---------|
| Food category   | Products    | Ethephon (mg/kg) |         |
|   |             | Old MRL          | New MRL |
| Pome fruits   | Apples      | 0.8              | 0.7     |
| Berries and small fruits  | Blueberries | 20               | 0.01*   |
| Miscellaneous fruit   | Pineapples  | 2                | 1.5     |
| Cereals   | Barley      | 1                | 1.5     |
|   | Rye         | 1                | 0.8     |
|   | Wheat       | 1                | 0.5     |
| * Limit of determination.   |             |                  |         |
