

Maximum residue levels for fenpicoxamid

Published by AGRINFO on 29 Jun 2023

EU increases MRLs for fenpicoxamid on animal products

Commission Regulation (EU) [2023/1069](#) of 1 June 2023 amending Annex II to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for bixafen, cyprodinil, fenhexamid, fenpicoxamid, fenpyroximate, flutianil, isoxaflutole, mandipropamid, methoxyfenozide, and spinetoram in or on certain products

Update

On 2 June 2023 the EU published a Regulation increasing the MRL for fenpicoxamid on animal products.

Impacted products

products from swine, cattle, sheep, goats, horses, farmed animals, milk

What is changing?

The EU has increased the MRLs for fenpicoxamid as summarised in Table 1.

Why?

New Codex MRLs (CXLs) for fenpicoxamid have been adopted. [EFSA \(2022\)](#) has not identified a consumer health risk for these CXLs, so they have been adopted as EU MRLs.

Timeline

The new EU MRLs for fenpicoxamid will apply from **22 June 2023**.

Background

MRLs are set in accordance with the rules set out in Regulation [396/2005](#). For information on current MRLs for other substances, please consult the [EU Pesticide Residues database](#).

Table & Figures

Table 1 Changes to maximum residue levels for fenpicoxamid			
Food category	Products	Fenpicoxamid (mg/kg)	
		Old MRL	New MRL
Animal products	Muscle, fat from swine, cattle, sheep, goats, horses, other farmed animals	0.01*	0.015
	Kidney from swine, goats, horses, other farmed animals	0.01*	0.02
	Liver from swine, cattle, goats, horses, other farmed animals	0.01*	0.02
	Edible offals from swine, cattle, sheep, goats, horses, other farmed animals	0.01*	0.02
	Milk from cattle, sheep, goats, horses	0.01*	0.015
* Limit of determination.
