Maximum residue levels for folpet

Published by AGRINFO on 05 Jun 2023; Revised 09 Nov 2026

Draft Commission Regulation as regards maximum residue levels for cycloxydim, ethofumesate, folpet, mepiquat and quinmerac in or on certain products

Draft Annex II [PLAN/2026/1732]

What is changing and why?

The European Union (EU) will raise the maximum residue levels (MRLs) for folpet on bananas from 0.03 to 0.9 mg/kg, and in honey from 0.05 to 0.7 mg/kg. This follows a positive evaluation of their safety for consumers by the European Food Safety Authority.

Timeline

The new MRLs are expected to apply from early 2027.
