

# Maximum residue levels for haloxyfop

*Published by AGRINFO on 25 Jul 2023; Revised 01 Feb 2024*

Commission Regulation (EU) [2024/398](#) as regards maximum residue levels for haloxyfop in or on certain products

## What is changing and why?

Changes to the maximum residue levels (MRLs) for haloxyfop are set out in Table 1.

In addition, the LOD on milk is lowered from 0.015 to 0.002 mg/kg. (LOD: limit of determination, the lowest level that can be detected using the most modern and reliable analytical methods.)

## Actions

For all products mentioned in Table 1 – except onions, linseeds, sunflower seeds, rapeseeds, and canola seeds, for which import tolerances have been set – suppliers should review their current use of haloxyfop and explore alternative solutions.

## Timeline

The new MRLs will apply from **19 August 2024**.

For more information see the [full record](#) on the AGRINFO website – where you can also view the latest [AGRINFO Update](#) newsletters and [search](#) the database.

## Tables & Figures

Table 1 Changes to maximum residue levels for haloxyfop			
Food category	Products	Haloxyfop (mg/kg)	
		Old MRL	New MRL
Root and tuber vegetables	Carrots, parsley roots/ Hamburg root parsley	0.09	0.01*
Stem vegetables	Leeks	0.09	0.01*
Pulses	Beans, peas	0.15	0.01*
Oilseeds	Linseeds	0.01*	0.05
	Sunflower seeds	0.4	0.3
	Rapeseeds/ canola seeds	0.2	0.05
Sugar plants	Sugar beet roots	0.2	0.01*
Animal products	Liver (swine, sheep, goat, cattle, horse, poultry, and other farmed terrestrial animals)	0.03	0.01*
	Swine kidney and edible offals	0.06	0.01*
	Kidney and edible offals (cattle, sheep, goat, horse, and other farmed terrestrial animals)	0.07	0.01*
	Poultry edible offals	0.03	0.01*
	Poultry fat	0.015	0.01*
	Milk (cattle, sheep, goat, horse)	0.015	0.002*
