

Maximum residue levels for indoxacarb

Published by AGRINFO on 25 Jul 2023; Revised 25 Jan 2024

EU reduces MRLs for indoxacarb on all products

Commission Regulation (EU) [2024/376](#) of 24 January 2024 amending Annexes II and V to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for indoxacarb in or on certain products

Update

The EU has reduced the maximum residue levels (MRLs) for indoxacarb to the limit of determination (LOD, the lowest level that can be detected using the most modern and reliable analytical methods). This applies to all products except cranberries and teas.

Impacted products

apples, pears, apricots, cherries, peaches, plums, table grapes, wine grapes, strawberries, blackberries, raspberries, blueberries, currants (black, red and white), gooseberries (green, red and yellow), rose hips, mulberries (black and white), azaroles/ Mediterranean medlars, elderberries, bananas, radishes, tomatoes, aubergines/ eggplants, cucumbers, courgettes, gherkins, melons, pumpkins, watermelons, sweet peppers/ bell peppers, broccoli, cauliflowers, Brussels sprouts, head cabbages, Chinese cabbages/pe-tsai, kales, lamb's lettuces/ corn salads, lettuces, escaroles/ broad-leaved endives, cresses and other sprouts and shoots, land cresses, red mustards, Roman rocket/ rucola, baby leaf crops (including brassica species), spinaches, purslanes, chards/ beet leaves, chervil, chives, celery leaves, parsley, sage, rosemary, thyme, laurel/ bay leaves, tarragon, basil and edible flowers, beans (with pods), cardoons, Florence fennels, rhubarbs, celeries, globe artichokes, beans, peas, rapeseeds/ canola seeds, mustard seeds, soya beans, cotton seeds, sugar beet roots, muscle and fat from swine, cattle, sheep, goat, equine and other farmed terrestrial animals, liver, kidney and edible offals from swine, cattle, sheep, goat, equine and other farmed terrestrial animals, milk (cattle, sheep, goat, horse), bird eggs (chicken, duck, geese, quail)

What is changing?

The EU has reduced the MRLs for indoxacarb as summarised in Table 1. MRLs remain in place for teas (5 mg/kg) and cranberries (1 mg/kg).

Why?

Since 2021, indoxacarb has not been authorised for use in the EU.

The European Food Safety Agency reviewed the renewal of this active substance ([EFSA 2018](#)), and later assessed the remaining MRLs that were based on import tolerances and Codex MRLs (CXLs) ([EFSA 2022](#)). On the basis of this assessment, the European Commission concluded that, for cranberries and teas, the current MRLs are not expected to pose an unacceptable risk for consumers, and these MRLs should be maintained.

For all other products, risks to consumer health could not be excluded. Their MRLs are therefore set to the LOD. For all products except spices and honey, the LOD has been reduced to 0.01 mg/kg. For spices and honey, the LOD remains at 0.05 mg/kg.

Timeline

The new MRLs will apply from 14 August 2024. All products on the EU market after 14 August 2024 must comply with the new MRLs, even if they were put on the market before that date. Products exported before 14 August 2024 should therefore also be checked for their compliance with the new MRLs.

Recommended Actions

Exporters of affected products should urgently review their current use of indoxacarb and evaluate possible alternative solutions to meet the new MRLs.

Background

MRLs are set in accordance with the rules set out in Regulation [EC \(No\) 396/2005](#). For information on current MRLs for other substances, please consult the [EU Pesticide Residues database](#).

Table & Figures

Table 1 Changes to maximum residue levels for indoxacarb			
Food category	Products	Indoxacarb (mg/kg)	
		Old MRL	New MRL
Pome fruits	Apples, pears	0.5	0.01*
Stone fruits	Apricots, cherries, peaches, plums	1	0.01*
Berries and small fruits	Table grapes, wine grapes	2	0.01*
	Blackberries	0.5	0.01*
	Raspberries, strawberries	0.6	0.01*
	Blueberries, currants (black, red, white), gooseberries (green, red, yellow), rose hips, mulberries (black, white), azaroles/ Mediterranean medlars, elderberries	0.8	0.01*
	Cranberries	1	0.01*
Miscellaneous fruits	Bananas	0.2	0.01*
Root and tuber vegetables	Radishes	0.3	0.01*
Fruiting vegetables	Tomatoes, aubergines/ eggplants, cucumbers, courgettes, gherkins, melons, pumpkins, watermelons	0.5	0.01*
	Sweet peppers/ bell peppers	0.3	0.01*
Flowering brassica	Broccoli, cauliflowers	0.3	0.01*
Head brassica	Brussels sprouts	0.06	0.01*
	Head cabbages	0.2	0.01*
Leafy brassica	Chinese cabbages/ pe-tsai	3	0.01*
	Kales	0.4	0.01*
Lettuces and salad plants	Lamb's lettuces/ corn salads	30	0.01*
	Lettuces	3	0.01*
	Escaroles/ broad-leaved endives, cresses and other sprouts and shoots, land cresses, red mustards	1	0.01*
	Roman rocket/ rucola, baby leaf crops (including brassica species)	2	0.01*
Spinaches and similar leaves	Spinaches	2	0.01*
	Purslanes, chards/ beet leaves	1	0.01*
Herbs and edible flowers	Chervil, chives, celery leaves, parsley, sage, rosemary, thyme, laurel/ bay leaves, tarragon	2	0.02*
	Basil and edible flowers	15	0.02*
Legume vegetables	Beans (with pods)	0.5	0.01*
Stem vegetables	Cardoons, Florence fennels, rhubarbs	3	0.01*
	Celeries	2	0.01*
	Globe artichokes	0.2	0.01*
Pulses	Beans, peas	0.2	0.01*
Oilseeds	Rapeseeds/ canola seeds, mustard seeds	0.05	0.01*
	Soyabeans	0.5	0.01*
	Cotton seeds	1	0.01*
Sugar plants	Sugar beet roots	0.1	0.01*
Products of animal origin	Muscle and fat from swine, cattle, sheep, goats, equine and other farmed terrestrial animals	2	0.01*
	Liver, kidney and edible offals from swine, cattle, sheep, goats, equine and other farmed terrestrial animals	0.05	0.01*
	Milk (cattle, sheep, goat, horse)	0.1	0.01*
	Bird eggs (chicken, duck, geese, quail)	0.02	0.01*

* Limit of determination.
