

Maximum residue levels for oxathiapiprolin

Published by AGRINFO on 14 Feb 2023; Revised 16 Jan 2026

Draft Commission Regulation as regards maximum residue levels for acetamiprid, aclonifen, deltamethrin, oxathiapiprolin and potassium phosphonates in or on certain products

Draft [Annex II](#)

What is changing and why?

The European Union (EU) is discussing increasing the maximum residue levels (MRLs) for oxathiapiprolin on Brussels sprouts, kales, watercresses, and all herbs except basil and edible flowers. The European Food Safety Authority has concluded that these MRLs are safe for consumers.

These changes and other recent amendments to oxathiapiprolin MRLs are summarised in Table 1.

Timeline

The new MRLs for Brussels sprouts, kales, watercresses, and herbs (except basil and edible flowers) are expected to apply from **February 2026**.

For more information see the [full record](#) on the AGRINFO website – where you can also view the latest [AGRINFO Update](#) newsletters and [search](#) the database.

Tables & Figures

Table 1			
Changes to maximum residue levels for oxathiapiprolin			
Food category	Products	Oxathiapiprolin (mg/kg)	
		Old MRL	New MRL
Expected to apply from February 2026			
Brassica vegetables	Brussels sprouts	0.01*	0.015
	Kales	0.01*	0.04
Leaf vegetables	Watercresses	0.01*	1.5
Herbs and edible flowers	All herbs (except basil and edible flowers)	0.02*	1.5
Applies from 6 July 2025			
Miscellaneous fruits	Avocados	0.01*	0.07
Berries and small fruits	Currants, gooseberries, rose hips	0.01*	0.5
Applies from 12 February 2024			
Root and tuber vegetables	Radish leaves		1.5
Applies from 14 February 2023			
Berries and small fruits	Blueberries	0.01*	0.5
* Limit of determination.
