

Maximum residue levels for phosmet

Published by AGRINFO on 05 Jun 2023

EU reduces maximum residue levels for phosmet on all products

Commission Regulation (EU) [2023/1029](#) of 25 May 2023 amending Annexes III and V to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for phosmet in or on certain products

Update

On 26 May 2023, the European Commission published a Regulation reducing the maximum residue levels (MRLs) for phosmet to the limit of determination (LOD, the lowest level that can be detected using the most modern and reliable analytical methods). For phosmet these range between 0.005 and 0.05 mg/kg. There are implications for exporters of fruit, tree nuts, vegetables, cereals, teas and coffees, cereals, and animal products.

Impacted products

All spices, almonds, American persimmons/ Virginia kaki, apples, apricots, avocados, azaroles, banana, barley, basil and edible flowers, beans, blueberries, borage seeds, Brazil nuts, breadfruits, buckwheat, cane fruits, carambolas, cashew nuts, castor beans, celery leaves, cherimoyas, cherries, chervil, chestnuts, chives, coconuts, coffee beans, common millet/ proso millet, cotton seeds, cranberries, currants, dates, durians, elderberries, figs, gold of pleasure seeds, gooseberries, granate apples/ pomegranates, grapefruits, grapes, guavas, hazelnuts/ cobnuts, hemp seeds, herbal infusions, hops, jambuls/ jambolans, kaki/ Japanese persimmons, kapok, kiwi fruits, kumquats, laurel leaves, bay leaves, lemons, lentils, limes, linseeds, litchis/ lychees, loquats/ Japanese medlars, lupins, macadamias, maize/ corn, mandarins, mangoes, Mediterranean medlars, medlars, melons, mulberries, mustard seeds, oats, oil palm kernels, oil palm fruits, olives for oil production, oranges, parsley, passion fruits/ maracujas, peaches, peanuts/ groundnuts, pears, peas, pecans, pine nut kernels, pineapples, pistachios, plums, poppy seeds, potatoes, prickly pears/ cactus fruits, pumpkin seeds, quinces, rapeseeds, rice, rose hips, rosemary, rye, safflower seeds, sage, sesame seeds, sorghum, soursops/ guanabanas, soyabeans, star apples/ cainitos, strawberries, sunflower seeds, table olives, tarragon, teas, thyme, walnuts, watermelons, wheat

What is changing?

The changes to MRLs for phosmet are summarised in Table 1.

Why?

Phosmet is no longer permitted for use in the European Union. MRLs previously set for phosmet have therefore been deleted and set to the LOD, even on products for which the MRLs were based on CODEX MRLs as the European Food Safety Authority could not rule out harmful effects on human health ([EFSA 2022](#)).

Timeline

The Regulation enters into force on 15 June 2023.

The new MRLs will apply from **15 September 2023**.

What are the major implications for exporting countries?

Chile and Brazil have raised concerns to the World Trade Organization that the reduction in MRLs will have a significant impact on trade of citrus fruits ([WTO 2022](#)).

Recommended Actions

Suppliers to the EU market of fruits, vegetables, cereals, teas and coffees, and animal products should immediately review their current use of phosmet, and should seek alternative solutions where necessary.

The new reduced MRLs will apply to all food on the EU market from **15 September 2023**. Food exported to the EU before that date must comply with the new MRLs if it is still on the market after 15 September.

Suppliers and competent authorities should verify that laboratories used to check compliance are able to test to levels of 0.005 mg/kg on apples, pears, pineapples, potatoes, melons, watermelons, sugar beet roots, and milk from cattle.

Background

MRLs are set in accordance with the rules set out in Regulation [396/2005](#). For information on current MRLs for other substances, please consult the [EU Pesticide Residues database](#).

Table & Figures

Table 1 Changes to maximum residue levels for phosmet			
Food category	Products ¹	Phosmet (mg/kg)	
		Old MRL	New MRL
Citrus fruits	Grapefruits, lemons, limes, mandarins	0.5	0.01*
	Oranges	0.5	0.005*
Tree nuts	Almonds, chestnuts, pistachios, walnuts	2	0.01*
	Brazil nuts, cashew nuts, coconuts, macadamias, pecans, pine nut kernels	0.05*	0.01*
	Hazelnuts/cobnuts	0.1	0.01*
Pome fruits	Apples, pears	0.5	0.005*
	Quinces, medlars, loquats/ Japanese medlars	0.5	0.01*
Stone fruits	Apricots,	0.05*	0.01*
	Cherries, peaches	1	0.01*
	Plums	0.6	0.01*
Berries and small fruits	Grapes, strawberries, cane fruits, gooseberries	0.05*	0.01*
	Blueberries, cranberries	10	0.01*
	Currants, rose hips, mulberries, azaroles, Mediterranean medlars, elderberries	2	0.01*
Miscellaneous fruits	Dates, kaki/ Japanese persimmons, kiwi fruits, passion fruits/ maracujas, avocados, bananas, mangoes, granate apples/ pomegranates, breadfruits, durians, soursops/ guanabanas	0.05*	0.01*
	Pineapples	0.05*	0.005*
	Figs, kumquats, carambolas, jambuls/ jambolans, litchis/ lychees, prickly pears/ cactus fruits, star apples/ cainitos, American persimmons/ Virginia kaki, cherimoyas, guavas	2	0.01*
	Table olives	3	0.01*
Vegetables	Potatoes, melons, watermelons	0.05*	0.005*
	All other vegetables	0.05*	0.01*
Herbs and edible flowers	Chervil, chives, celery leaves, parsley, sage, rosemary, thyme, basil and edible flowers, laurel/ bay leaves, tarragon	0.05*	0.02*
Pulses	Beans, lentils, peas, lupins	0.05*	0.01*
Oilseeds	Linseeds, peanuts/ groundnuts, poppy seeds, sesame seeds, sunflower seeds, rapeseeds, soyabeans, mustard seeds, cotton seeds, pumpkin seeds, safflower seeds, borage seeds, gold of pleasure seeds, hemp seeds, castor beans	0.05*	0.01*
Oil fruits	Olives for oil production	3	0.01*
	Oil palm kernels, oil palm fruits, kapok	0.05*	0.01*
Cereals	Barley, buckwheat, maize/ corn, common millet/ proso millet, oat, rice, rye, wheat	0.05*	0.01*
	Sorghum	2	0.01*
Teas	Teas	0.1*	0.01*
Coffee beans	Coffee beans	0.1*	0.05*
Herbal infusions	Herbal infusions	0.1*	0.05*
Hops	Hops	0.1*	0.05*
Spices	All spices	0.1*	0.05*
Sugar plants	Sugar beet roots	0.05*	0.005*
	Sugar canes, chicory roots	0.05*	0.01*
Animal products	Muscle, fat, liver, kidney and edible offals from bovine and equine animals, sheep, goats, swine, poultry	0.1	0.01*
	Milk from cattle	0.05*	0.005*
	Milk from sheep, goats, horses	0.05*	0.01*
	Bird eggs	0.05*	0.01*

¹ Where a product is not listed in this table, the MRL remains unchanged.
* Limit of determination.
