

# Maximum residue levels for prosulfocarb

*Published by AGRINFO on 14 Feb 2023*

## EU increases MRL for prosulfocarb on herbs and edible flowers

Commission Regulation (EU) [2023/129](#) of 18 January 2023 amending Annex II to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for azoxystrobin, prosulfocarb, sedaxane and valifenalate in or on certain products

### Update

The EU has published a Regulation increasing the maximum residue level (MRL) for prosulfocarb on herbs and edible flowers.

### Impacted products

herbs, edible flowers

### What is changing?

The EU has established an MRL of 0.2 mg/kg for herbs and edible flowers. The MRL was previously set at the limit of determination (LOD) of 0.01 mg/kg.

### Why?

In response to an application requesting modification of the existing MRL for prosulfocarb on herbs and edible flowers, [EFSA \(2022\)](#) concluded that the requested modification was acceptable with regard to consumer safety.

### Timeline

The new MRL will apply from 26 February 2023.

## Background

MRLs are set in accordance with the rules set out in Regulation [396/2005](#). For information on current MRLs for other substances, please consult the [EU Pesticide Residues database](#).
