Maximum residue levels on radish leaves

Published by AGRINFO on 28 Feb 2024; Revised 28 Dec 2024

Commission Regulation (EU) 2024/3196 as regards radish leaves

What is changing and why?

Previously the maximum residue levels (MRLs) for radish leaves were the same as the MRLs for kale. This Regulation introduces a distinction between small and large radish leaves:

- large radish leaves: MRLs for kale apply
- small radish leaves: MRLs for Roman rocket/rucola apply.

Actions

The MRLs for kales and Roman rocket/rucola are not always the same. Exporters of **small** radish leaves should check if their products comply with the MRLs for Roman rocket/rucola. An overview of all EU MRLs can be found in the EU Pesticide Residues database.

Timeline

The MRLs for Roman rocket/rucola will apply to small radish leaves from **8 January 2025**.
