

Nicotinamide riboside chloride added to foods

Published by AGRINFO on 30 Nov 2022; Revised 01 Aug 2023

EU extends use of the novel food nicotinamide riboside chloride as a source of niacin in foods for special medical purposes, and in total diet replacements for weight control

Commission Delegated Regulation (EU) [2023/439](#) of 16 December 2022 amending the Annex to Regulation (EU) No 609/2013 of the European Parliament and of the Council to allow the use of nicotinamide riboside chloride as a source of niacin in food for special medical purposes and total diet replacement for weight control

Commission Regulation (EU) [2023/1065](#) of 1 June 2023 amending Annex II to Regulation (EC) No 1925/2006 of the European Parliament and of the Council as regards nicotinamide riboside chloride added to foods

Update

The European Commission has extended permitted use of the novel food nicotinamide riboside chloride as a source of niacin that may be added to foods, including foods for special medical purposes and total diet replacements for weight control.

Impacted products

novel foods

What is changing?

Regulation [2023/439](#) sets out conditions for use of nicotinamide riboside chloride in foods for special medical purposes and meal replacements. These conditions, set out in the Annex to the Regulation, include maximum levels and additional specific labelling requirements.

Regulation [2023/1065](#) authorises the addition to foods of nicotinamide riboside chloride as a form of niacin. It is now included in Annex II to Regulation [1925/2006](#), which lists all the vitamin formulations and mineral substances that may be added to foods.

Why?

Following an application to extend the use of nicotinamide riboside chloride to foods for special medical purposes and meal replacements, [EFSA \(2021\)](#) delivered a favourable opinion regarding its safety and bio-availability. The European Commission therefore considers that its use as a source of niacin in these foods, or in foods in general, is not a safety concern.

Timeline

Regulation [2023/439](#) entered into force on 21 March 2023.

Regulation [2023/1065](#) entered into force on 22 June 2023.

What are the major implications for exporting countries?

Producers of foods for special medical purposes and meal replacements may use nicotinamide riboside chloride as a source of niacin, in accordance with the specific conditions set out in the Regulation.

Background

Nicotinamide riboside chloride was first authorised by Implementing Regulation (EU) [2020/16](#) as a [novel food](#) for use on the EU market in food supplements for adults (excluding pregnant and lactating women).
