

Novel food: yellow tomato extract

Published by AGRINFO on 14 Nov 2025

EU authorises use of novel food yellow tomato extract in food supplements

Commission Implementing Regulation (EU) <u>2025/2242</u> of 7 November 2025 authorising the placing on the market of yellow tomato extract as a novel food and amending Implementing Regulation (EU) 2017/2470.

Update

The European Union (EU) has authorised the use of the novel food yellow tomato extract in food supplements intended for the adult population.

Impacted products

Tomato extract

What is changing?

The EU has authorised the use of yellow tomato extract as a novel food in food supplements intended for the adult population (excluding infants and children).

Food supplements containing yellow tomato extract must not exceed maximum levels of 100 mg/day.

Food supplements that contain yellow tomato extract must include in their labelling:

- "yellow tomato extract"
- a statement that the food supplements should be consumed by adults only.

Only the company that applied for authorisation, Lycored Ltd, is authorised to sell this novel food on the EU market over the next 5 years, unless they permit marketing by other companies, or if another company obtains a novel food authorisation without making reference to scientific data protected by Lycored Ltd.

Why?

The European Food Safety Authority (<u>EFSA 2025</u>) has concluded that the novel food yellow tomato extract is safe when used in food supplements intended for the adult population, when not exceeding specific maximum levels.

Timeline

This novel food may be placed on the EU market from 30 November 2025.

Background

This Regulation updates the Annex to Regulation <u>2017/2470</u> which lists authorised novel foods (see the <u>Union list of novel foods</u>). For further information on the EU novel foods authorisation process, see <u>Novel foods explained</u>.
