Plant health interceptions (EUROPHYT) in March 2025

Published by AGRINFO on 18 Jun 2025

March 2025 saw 74 interceptions due to harmful organisms involving 26 AGRINFO partner countries, and 485 interceptions due to other non-conformities involving 41 partner countries

TRACES: Number of occurrences of harmful organism(s) in commodities imported into the EU or Switzerland (March 2025)

Update

This report summarises EUROPHYT interceptions on products entering the European Union from low- and middle-income countries that occurred in March 2025.

In March 2025, there were 74 interceptions due to harmful organisms involving 26 AGRINFO partner countries, and 485 interceptions due to other non-conformities that involved 41 partner countries.

Interceptions

Harmful organisms

In February 2025 there were 74 EUROPHYT interceptions due to harmful organisms involving 26 low- and middle-income (AGRINFO partner) countries (see Table 1).

Other non-conformities

There were also 485 interceptions due to other non-conformities, involving 41 partner countries (see Table 2).

For more detail see TRACES: Number of occurrences of harmful organism(s) in commodities imported into the EU or Switzerland (March 2025).

Timeline

March 2025

What are the major implications for exporting countries?

EUROPHYT interceptions can have significant impacts on producers and exporters. A shipment is intercepted at EU border controls when products do not comply with the EU's phytosanitary requirements. As a result, the affected importer/ exporter/ producer may face a range of consequences, including delayed shipments, additional costs of testing and inspection, and potential rejections or destruction of their products. These interceptions can also damage the reputation of the producer/ exporter in the EU market, which may affect their ability to conduct future trade with EU buyers. It can also have impacts on the export sector as a whole, particularly when repeated interceptions lead to more stringent plant health measures or bans.

Recommended Actions

To avoid the risk of interceptions, producers and exporters must take proactive measures to ensure their products comply with EU phytosanitary requirements. This can include implementing effective pest management strategies, using certified seeds and planting material, and complying with regulations and standards.

Background

EUROPHYT is the European Union Notification System for Plant Health Interceptions.

The basis for EUROPHYT interceptions is the obligation for EU Member States (and Switzerland) to rapidly report the occurrence of harmful organisms and other non-conformities found during import controls, to prevent the introduction and spread of pests and diseases. Interceptions due to "other non-conformities" are usually caused by an inaccurate or missing phytosanitary certificate.

Notifications of such interceptions are disseminated EU-wide and to the National Plant Protection Organisation (NPPO) of the exporting country. The legal framework for EUROPHYT interceptions is provided by Regulation (EU) 2016/2031on plant health. For more information about plant health law, see EU plant health law explained.
