

Rejection of a health claim for Appethyl® confirmed

Published by AGRINFO on 28 Feb 2025

Commission Regulation (EU) [2025/350](#) refusing to authorise a health claim made on foods, other than those referring to the reduction of disease risk and to children's development and health

What is changing and why?

The European Union (EU) has refused the authorisation of a health claim that Appethyl® helps body weight reduction during mild calorie reduction. This follows a scientific assessment by the European Food Safety Authority, which found no cause-and-effect relationship between Appethyl® and the claimed health effect.

Timeline

The Regulation will enter into force on **13 March 2025**.
