

Rejection of health claim on creatine and cognitive function

Published by AGRINFO on 09 Oct 2025

Draft Commission Regulation refusing to authorise a health claim made on foods, other than those referring to the reduction of disease risk and to children's development and health

Draft Annex

What is changing and why?

The European Commission intends to reject a health claim that creatine supplementation improves cognitive function. The European Food Safety Authority has concluded that a relationship cannot be established between the consumption of creatine and the effects claimed.

Actions

Competent authorities of non-EU countries that are members of the World Trade Organization may comment on the EU proposal by emailing the [EU TBT Enquiry Point](#) until **30 November 2025** ([G/TBT/N/EU/1163](#)).

Timeline

The Regulation is expected to be adopted in approximately the second quarter of 2026.
