Renewed authorisations: genetically modified maize MON 87427, oilseed rape MON 88302, and soyabean MON 87708

Published by AGRINFO on 12 Feb 2026

Commission Implementing Decision (EU) 2025/2541 on renewing the authorisation for the placing on the market of products containing, consisting of or produced from genetically modified maize MON 87427

Commission Implementing Decision (EU) 2025/2542 on renewing the authorisation for the placing on the market of products containing, consisting of or produced from genetically modified oilseed rape MON 88302

Commission Implementing Decision (EU) 2025/2554 renewing the authorisation for the placing on the market of products containing, consisting of or produced from genetically modified soybean MON 87708

What is changing and why?

The European Union (EU) has renewed the authorisations of genetically modified maize MON 87427, oilseed rape MON 88302, and soyabean MON 87708. This allows these GM maizes, and products containing them, to continue to be placed on the EU market. However, cultivation of these crops in the EU remains prohibited. The renewed authorisations are based on favourable scientific opinions by the European Food Safety Authority.

Timeline

This authorisation is valid for a period of 10 years from 18 December 2025.
