

Reports on non-compliance with EU food law and agri-food fraud: April 2026

Published by AGRINFO on 09 Jun 2026

European Commission: [April 2026 Report on EU Agri-Food Fraud Suspicions](#)

Latest notifications

The European Commission publishes monthly overviews of foods that do not comply with European Union (EU) food law, including potentially fraudulent practices that are identified and reported by EU Member State authorities. The Commission compiles these overviews of non-compliance based on information from the EU's Rapid Alert System for Food and Feed Network ([RASFF](#)), Administrative Assistance and Cooperation Network ([AAC](#)), and Agri-Food Fraud Network ([FFN](#)). These monthly overviews help agri-food exporters and competent authorities in non-EU countries to monitor and address risks that may affect trade. Those non-compliances are not confirmed fraud cases, but they contribute to alerting and triggering investigations by competent authorities of EU Member States.

The April 2026 report includes notifications involving the following 20 AGRINFO [partner countries](#): **Argentina, Bangladesh, Brazil, China, Colombia, Côte d'Ivoire, Ecuador, Egypt, Honduras, India, Iran, Lebanon, Mexico, Moldova, Sri Lanka, Syria, Thailand, Türkiye, Ukraine, Viet Nam.**

These notifications concern:

- product and record tampering (Table 1)
- unauthorised foods, ingredients and origins, and residues not compliant with maximum residue levels (MRLs) (Table 2).

This report should be read in conjunction with [RASFF notifications in April 2026](#). RASFF notifications that relate purely to consumer risk with no suspicion of fraud are not included in this report.

Actions

Competent authorities in countries that are included in these monthly overviews should pay attention to any non-compliances identified in the reports. It is particularly important that the producers/export companies concerned are informed as soon as possible so that they can take action and prevent a recurrence. These incidents also potentially indicate a more widespread problem that may require a coordinated response by the food sector in the country concerned.

Timeline

These reports are issued every month.
