Recommended Actions

Competent authorities in countries that are included in these monthly overviews should pay attention to any non-compliances identified in the reports. It is particularly important that the producers/export companies concerned are informed as soon as possible so that they can take action and prevent a recurrence. These incidents also potentially indicate a more widespread problem that may require a coordinated response by the food sector in the country concerned.

Background

These monthly reports compile information notified to the EU's Rapid Alert System for Food and Feed Network ([RASFF](#)), Administrative Assistance and Cooperation Network ([AAC](#)), and Agri-Food Fraud Network ([FFN](#)). The reports also include non-compliances with EU rules that do not present a risk, but have triggered investigations by the competent authorities of individual importing EU Member States.
