

Revision of the EU geographical indications scheme

Published by AGRINFO on 30 Nov 2022; Revised 10 Feb 2025

EU revises geographical indications scheme protecting product names

Regulation (EU) [2024/1143](#) on geographical indications for wine, spirit drinks and agricultural products, as well as traditional specialties guaranteed and optional quality terms for agricultural products, amending Regulations (EU) No 1308/2013, (EU) 2019/787 and (EU) 2019/1753 and repealing Regulation (EU) No 1151/2012.

Commission Implementing Regulation (EU) [2025/26](#) laying down rules for the application of Regulation (EU) 2024/1143 as regards registrations, amendments, cancellations, enforcement of the protection, labelling and communication in respect of geographical indications and traditional specialties guaranteed, and amending Implementing Regulation (EU) 2019/34 as regards geographical indications in the wine sector, and repealing Implementing Regulations (EU) No 668/2014 and (EU) 2021/1236

Commission Delegated Regulations of 30 October 2024: [2025/27](#); [2025/28](#); [2025/29](#)

Update

Regulation [2024/1143](#) provides general rules on geographical indications (GIs) for wine, spirit drinks, and agricultural products, as well as on traditional specialties guaranteed (TSGs) and optional quality terms. Since 18 January 2025, additional rules apply for registrations, amendments, cancellations, enforcement of protection, labelling, and communication (Regulation [2025/26](#)), and additional rules for registration and protection of GIs (Regulation [2025/27](#)).

What is changing?

Overview

Regulation [2024/1143](#) makes the protection of GIs more uniform. It also establishes a system of protection for TSGs, and optional quality terms for agricultural products and spirit drinks (not for wine, which is covered by specific Regulations). It mainly replaces previous rules on quality schemes for agri-food products that were set by Regulation 1151/2012.

It is complemented by Regulations [2025/26](#) and [2025/27](#), which explain the procedures to apply for registrations, or to amend or cancel them. These Regulations also cover the enforcement of

protection, labelling of GIs and TSGs, submissions of opposition, and other elements. Table 1 lists the templates provided in the Annexes to Regulation 2025/26.

Additional Regulations align existing rules on GIs and TSGs for wine (Regulation [2025/28](#) supplementing Regulation [1308/2013](#)), and repeal some previous rules (Regulation [2025/29](#)).

A clear overview of the changes can be seen in Annex IV of Regulation [2024/1143](#), which compares previous Regulations with the updated rules.

Improving online protection of GIs

The misuse of GIs is particularly prevalent in online marketplaces, with around double the average number of violations as in traditional marketplaces ([European Commission 2021](#)). The establishment of domain names similar or identical to GIs was previously not illegal. Regulation [2024/1143](#) (Art. 26) extends the protection of GIs to information provided on websites and domain names accessible in the EU.

Pursuing sustainability goals

Regulation [2024/1143](#) recognises the contribution of GIs to sustainability, including to circular economies. In the case of producer groups, they may agree on a voluntary basis to sustainable practices in the production of GI designated products (Art. 7). These practices contribute to at least one of the three main areas of sustainability: environmental, social, and economic, and are intended to result in higher sustainability standards than those that are mandatory in EU or national laws.

Where a producer group decides that the sustainable practices are mandatory for all producers, these practices can be included in the GI product specification [Art. 7(3)]. Producer groups can communicate on their sustainable practices by publishing and updating a sustainability report (Art. 8), and this is made public by the European Commission.

Improving recognition of EU GI symbols

There is limited public awareness of EU quality logos (e.g. only 20% of consumers surveyed recognised the PGI logo), and there is confusion between the different labelling schemes ([European Commission 2021](#)). Regulation [2024/1143](#) aims to ensure better understanding among consumers of the different quality symbols, indications, and abbreviations.

For agricultural products, the following rules apply to the use of EU symbols on packaging (labelling and advertising materials):

- displaying the PGI and PDO symbols is voluntary for non-EU country products and mandatory for EU products (with the exception of spirit drinks) (Art. 37)
- displaying the TSG symbol is voluntary for non-EU country products and mandatory for EU products (Art. 70).

The symbols that should be used to identify PGI, PGO, and TSG are provided in Regulation [2025/26](#), Annex XVII.

These symbols may also be used when labelling and advertising processed products where the GI is relevant to an ingredient.

Other key improvements

- Online register: The EU digital register of GIs, eAmbrosia, offers easy access to information on registered names, product specifications, and status updates on ongoing applications. The European Union Intellectual Property Office (EUIPO) maintains and updates eAmbrosia (Regulations 2024/1143 Art. 22; 2025/26 Art. 16).
- Electronic submissions: Applications for registration of GIs (Regulation 2024/1143 Art. 14) and TSGs (Art. 58), as well as amendments (Regulation 2025/26 Arts. 10, 28) should be submitted online on eAmbrosia.
- Standard forms: Templates must now be used for each step of the procedures linked to GI (registration, amendments, etc.), as given in the Annexes to Regulation 2025/26 – see Table 1.
- Opposition procedures: the procedures for GI are explained in Regulation 2024/1143 Art. 17; those for TSG are given in Regulations 2024/1143 (Art. 61), 2025/26 (Art. 26), and 2025/27 (Art. 10).
- Attestations of compliance enable operators to use a registered PDO/PGI or TSG if their agricultural products or spirit drinks comply with the relevant product specification in Regulation 2024/1143: for PDO/PGI (Art. 39) or for TSG (Art. 72). Operators requesting the verification of compliance have to cover the costs involved. If a product is found to comply with the product specification, an attestation of compliance is provided allowing the use of PDO/PGI (Art. 45) or TSG (Art. 77). This attestation can be delivered online (Regulation 2025/26 Art. 17). (Rules for compliance with GIs for wine are set in Regulation 1308/2013.)

Why?

Regulation 2024/1143 and the additional Regulations published in early 2025 aim to ensure uniform recognition and protection throughout the EU for the intellectual property rights related to protected names.

Timeline

All the provisions of Regulation [2024/1143](#) apply from **1 January 2025**.

Regulations [2025/26](#), [2025/27](#), [2025/28](#), and [2025/29](#) apply from **18 January 2025**.

Recommended Actions

These new rules do not create a significant additional workload for non-EU applicants registering GIs or TSGs within the EU.

An application to register a GI can be made by a producer group or – under some circumstances – a single producer. Where a geographical area crosses the border between two countries, a joint application may be made by several groups (Regulation [2024/1143](#) Art. 9).

The documentation to apply for registration (in one of the EU official languages) is listed in Regulation [2024/1143](#):

- PDO/PGI: Art. 13(2)
- TSG: Art. 57 (as amended by Regulation 2025/26 Art. 21).

For more details about applying for registration of GIs, see [Geographical indications for agricultural products and foodstuffs explained](#).

Attestation of compliance: Non-EU countries that have obtained a protected name (GI or TSG) in the EU still need to demonstrate compliance with the relevant product specification **every** time they place their product on the EU market. Compliance can be verified by competent authorities or a product certification body in the non-EU-country (Regulation [2024/1143](#) Arts. 39 and 77). The attestation of compliance can be provided in paper or electronic form.

Background

Regulation 2024/1143 replaces Regulation [1151/2012](#) concerning GIs for wine, spirit drinks, and agricultural products, as well as other quality schemes. For more information on GI and other EU quality schemes, see [Geographical indications for agricultural products and foodstuffs explained](#).

Table & Figures

Table 1 Standard templates in Annexes to Regulation 2025/26	
Annex	Topic
I	Single document for PGI and PDO:
	Part I agricultural products
	Part II wine
	Part III spirit drinks
II	Opposition to GI
III	Notification of the results of consultations following the opposition procedure for GI
IV	Application to amend a product specification of an EU registered GI
V	Communication of approval of a standard amendment to a GI
VI	Communication of approval of a temporary amendment to a GI
VII	Request for cancellation of a GI – if compliance with the product specification can no longer be ensured, or no product covered by the GI has been placed on the market for 7 consecutive years
VIII	Request for cancellation of a GI – on request by producers of the product
IX	Official attestation or listing of an operator compliant with a product specification for GI
X	Product specification of a TSG
XI	Opposition to TSG
XII	Notification of the results of consultations following the opposition procedure for TSG
XIII	Application to amend a product specification of a TSG
XIV	Request for cancellation of a TSG – if compliance with the product specification can no longer be ensured, or no product covered by the TSG has been placed on the market for 7 consecutive years
XV	Request for cancellation of a TSG – on request by producers of the product
XVI	Official attestation or listing of an operator compliant with a product specification for TSG
XVII	Reproduction of the EU symbols and indications of use for PDO, PGI, and TSG
XVIII	Classification of products for TSG
GI, geographical indication; PDO, protected designation of origin; PGI, protected geographical indication; TSG, traditional speciality guaranteed.
