

Welcome to Issue 44 of AGRINFO UPDATE. The European Union has published the new Packaging and Packaging Waste Regulation, which replaces the current EU Packaging Directive. The first of the new requirements will come into force in August 2026, and could require significant adjustments for operators exporting packaged food to the EU. There are currently opportunities to provide feedback on proposed updates to the list of substances that can be used in organic production, and on maximum residue levels (MRLs) for ketoprofen in animal products. New Regulations coming into force cover changes to pesticide MRLs, food additives, and novel foods. For producers looking to apply for geographical indications, new rules relating to the registration process apply from January. We also provide overviews of recent RASFF notifications, plant health-related trade interceptions, and cases of imports not complying with EU law.

AGRINFO provides a regular information service keeping you up-to-date on evolving EU policies, regulations, and standards that have potential impacts on agricultural value chains in low- and middle-income countries. Find links below to our website at www.agrininfo.eu, where we give clear summaries about recent and upcoming changes, and actions that companies or authorities need to take to meet the new rules. If you need more information, eligible stakeholders can contact us via the [Ask AGRINFO](#) service*.

LATEST

New Regulations or policies under development
