

[Français](#) | [Español](#) | [Português](#)

Welcome to Issue 58 of AGRINFO UPDATE. We report on two new EU public consultations on EU initiatives to simplify food and feed safety rules, and to strengthen animal welfare rules. Also, stakeholders can give feedback through the World Trade Organization on a proposed updated list, related to public health, of countries that can export animal products to the EU.

Recently published regulations include new maximum levels of inorganic arsenic in fish and seafood, and a maximum residue level for fluralaner in fin fish. We also report on the EU's overview of the most recent findings of non-compliant food imports.

Finally – please register now for our remaining October webinars on how companies and competent authorities can use the EU's TRACES system for veterinary and plant health certificates.

AGRINFO provides a regular information service keeping you up-to-date on evolving EU policies, regulations, and standards that have potential impacts on agricultural value chains in low- and middle-income countries. This email contains links to our website at [www.agrinfo.eu](http://www.agrinfo.eu), where we give clear summaries about recent and upcoming changes, and actions that companies or authorities need to take to meet the new rules. If you need more information, eligible stakeholders can contact us via the [Ask AGRINFO](#) service (available to subscribers working for public authorities, sector associations, or farmer organisations in AGRINFO [target countries](#)).

*The AGRINFO programme is implemented by COLEAD and funded by the European Union. This publication has been produced with the financial support of the European Union. Its contents are the sole responsibility of COLEAD and can under no circumstances be regarded as reflecting the position of the EU.*

*AGRINFO keeps you up-to-date on evolving EU policies, regulations and standards impacting agri-food trade. It provides clear summaries for trade partners in low- and middle-income countries about the “what, why and when” of recent and upcoming changes, and actions needed to adjust to new rules.*
