

[Français](#) | [Español](#) | [Português](#)

Welcome to Issue 71 of AGRINFO UPDATE. This issue highlights two new EU proposals on contaminants in infant and baby foods that have been notified to the World Trade Organization, as well as proposals on pesticide maximum residue levels (MRLs) – and remember to check our new [Pesticide MRL Tracker](#) to see further possible MRL changes under discussion.

There have been changes to the number of companies that must report under the EU's Corporate Sustainability Reporting Directive (CSRD), as well as the information they must provide. The EU has now issued helpful guidance and FAQ documents on the new packaging rules. Also – see the new AGRINFO Explainer on the major EU initiatives to improve its recycling of plastic.

Finally, this issue highlights the latest overviews of food imports where food fraud was identified, as well as RASFF notifications due to the presence of pesticides and contaminants.

LATEST

New Regulations or policies under development

Packaging

The EU has now published Guidance and Frequently Asked Questions on the new packaging rules
