

Welcome to Issue 73 of AGRINFO UPDATE. The European Union (EU) is introducing new requirements for imports of ginger and turmeric rhizomes to prevent the spread of bacterial wilt, and for citrus fruit from the Americas against citrus fruit borer. Other new regulations include the suspension of Botswanan beef imports, and increased pesticide maximum residue levels (MRLs) on several products. The EU also proposes changes to the list of countries that can export certain animal products – there is an opportunity for countries to provide feedback through the World Trade Organization.

The rules are changing on the use of antimicrobials in farmed animals – to learn more, consult the new AGRINFO guidance, and sign up for our 28 May webinar.

LATEST

Events

Register now for 28 May webinar – use of antimicrobials

This upcoming AGRINFO webinar explains how to prepare for new EU rules on the use of antimicrobials in farmed animals in the food supply chain, coming in September 2026

AGRINFO provides a regular information service keeping you up to date on evolving EU policies, regulations, and standards that have potential impacts on agricultural value chains in low- and middle-income countries. This email contains links to our website at www.agrininfo.eu, where we give clear summaries about recent and upcoming changes, and actions that companies or authorities need to take to meet the new rules. If you need more information, eligible stakeholders in AGRINFO target countries can send [Questions](#) direct to the AGRINFO team.

The AGRINFO programme is implemented by COLEAD and funded by the European Union. This publication has been produced with the financial support of the European Union. Its contents are the sole responsibility of COLEAD and can under no circumstances be regarded as reflecting the position of the EU.

AGRINFO keeps you up to date on evolving EU policies, regulations, and standards impacting agri-food trade. It provides clear summaries for trade partners in low- and middle-income countries about the “what, why, and when” of recent and upcoming changes, and actions needed to adjust to new rules.
